As part of the consultation phase we would appreciate your input on the following questions.

The funding streams we are researching are geared towards supporting community projects and as such we need to demonstrate that we have fulfilled our commitment made at the village meeting to consult with the community. Our aim is to make this building the hub for many activities and we would value you ideas and opinions on achieving this objective. It is important we get as many questionaires returned as possible, so please take a few minutes to consider and complete.

From the list of examples below, please ask everyone in the houshold to indicate those activities that they would be prepared to use and then add any further ideas for our consideration
